Environmental Protection Policy

AIUT is an engineering company that combines industry experience, and advanced technologies to provide state-of-the-art and innovative solutions dedicated to meeting customer requirements.

AIUT provides practical ideas and products for the design, development, commissioning, and maintenance of industrial automation and robotics systems, including intelligent media and fuel monitoring systems, as well as IT systems for process management. The products and services offered by AIUT create new value, increasing operational efficiency, ensuring significant optimization of processes and reducing health and safety and fire regulations risks for the organization, setting new cooperation standards.

AIUT serves clients in Poland and around the world, strategically expanding its operations and organizing local competence centres to provide qualified engineering services for key clients.

This policy is part of the solutions in the field of corporate social responsibility of the AIUT Group - the introduction and responsible application of the principles of this environmental protection policy is our declaration and commitment to take actions ensuring the fullest possible protection of the environment and respect for natural resources.

Environmental Protection Policy in AIUT Group is based on:

- building a culture of rational environmental protection among employees at all levels of employment and associates, and raising environmental awareness of all employees and associates, encouraging them to apply the principles of environmental protection, including by organizing initiatives promoting pro-ecological action to introduce solutions that raise the standards of a clean environment in force in the entities of the AIUT Group and encourage people to submit ideas in this regard and responsible implementation of the principles of environmental protection,
- ongoing verification of changes in generally applicable law in the field of environmental protection and regular verification and updating of internal procedures in a manner ensuring compliance with generally applicable law on environmental protection,
- development and implementation of solutions and procedures supporting the implementation of the adopted environmental policy, including those creating actions and decisions taking into account correct environmental practices (in particular, but not only, in the areas of: GHG emissions, energy efficiency and

renewable energy, water quality and consumption, air quality, Responsible chemical management, sustainable resources management and waste reduction),,

- observing and implementing the latest solutions in the field of caring for the environment, through activities aimed at the protection of natural resources and the implementation of effective solutions on its own initiative,
- giving the appropriate importance to the environmental policy by making planning and investment decisions and implementing regulations of an environmental management system based on shaping the balance between society, economy and natural environment resources,
- implementation of goal-oriented solutions as well as continuous improvement and sustainable development in the field of environmental protection, including by promoting and constantly improving the regulations that make up the environmental management system,
- striving to systematically reduce the consumption of resources as well as the generation of waste and pollution in our operations, inter alia, through the use of energy-saving solutions and the implementation of appropriate, selective waste management,
- identifying adverse impacts on the environment and developing and implementing solutions that neutralize the interference with the natural environment as fully as possible, including by making every effort to use our special knowledge and experience to contribute to the development of environmentally friendly technologies,
- maintaining an open and honest dialogue with employees, associates, contractors and the public about the performance of our environmental activities and services,
- ensuring supervision over the proper fulfilment of reporting and registration obligations resulting from the provisions of generally applicable law,
- developing and implementing environmental initiatives in our business activities, including by producing high-quality products and providing services in an environmentally friendly manner,
- regular pursuit of, inter alia,:
 - reducing CO² and greenhouse gas emissions,
 - using the best possible solutions for air quality,
 - limiting the consumption of natural resources,
 - on continuous improvement of energy efficiency and the use of renewable energy,
 - resource management and waste reduction,
 - responsible management of chemicals.
- systematic monitoring of the operation of possible sources of pollution and striving to eliminate them or minimize their impact on the environment,
- regular inspections of machines in order to prevent breakdowns and events that could have a negative impact on the environment,
- taking direct actions to strengthen the natural environment by maintaining green areas on the premises of real estate managed by entities of the AIUT Group and making new plantings,

- continuous investment in more and more modern devices with a focus on their energy efficiency and other factors contributing to environmental protection,
- implementation of responsible action procedures in the event of a threat of the occurrence or occurrence of incidents or accidents negatively affecting the environment, covering both preventive measures, ad hoc measures and evaluation, including by promptly reporting any such cases to the relevant authorities and informing the parties concerned,
- encouraging suppliers and subcontractors of our products to adopt the same environmental protection principles and taking into account their respective environmental protection solutions when making decisions about undertaking business cooperation.

All employees and permanent associates of AIUT:

- ✓ work with the highest safety standards;
- ✓ engage in activities contributing to environmental protection;
- ✓ actively participate in the supervision of environmental protection by reporting all threats;
- ✓ cooperate with superiors in order to promote a culture of environmental protection;

Our commitment:

- Risk management:

- ✓ our action is preceded by a risk analysis and the resulting protective measures,
- ✓ we evaluate the risk whenever the generally applicable law, methods or conditions of work change;

- Training and practical knowledge and skills:

- ✓ AIUT organizes initiatives to promote good environmental protection habits;
- ✓ AIUT's employees are equipped with appropriate personal protective equipment;
- ✓ our subcontractors receive full support to the extent necessary to perform the commissioned works;
- ✓ the works planned by us are preceded by appropriate training and familiarization with the elements of environmental protection to the extent resulting from the provisions of generally applicable law and internal regulations;

- Consultation with employees:

In order to ensure the highest standards of environment protection, compliance with legal requirements and transparency of activities, the AIUT Management Board undertakes to:

- ✓ regularly consult employees on all matters affecting environmental protection as well as their safety and resulting from generally applicable provisions of law;
- ✓ inform AIUT employees about the results of work environment measurements that affect their health and safety,
- ✓ be open to all initiatives that improve health environment protection,
